Rungta College of Engineering and Technology Bhilai,(C.G)

Bachelor of Technology Nov 2020 - May 2024

Information Technology

Percentage: 74%

Data Structures, Software Engineering; Operating Systems; Algorithms, Computer Networks

Satyam Web Institute Bhagalpur,(BR)

CBSE 12TH May 2019 - May 2020

Percentage:69%

WORK EXPERIENCE

Railworld Ind Pvt Ltd

Oct 2023 - May 2024 **Raipur**

Software Developer

- Designed and developed user interfaces (UI) for mobile applications using React Native.
- Built reusable UI components for efficient and maintainable code.
- Ensured cross-platform compatibility of UI elements across iOS and Android.
- Optimized code for performance and responsiveness, delivering a smooth user experience.
- Integrated APIs to fetch and display data within the app's UI.
- Collaborated effectively with designers, back-end developers, and testers throughout the development lifecycle.

PROJECTS

LAUNDRY APP

- Designed and built a responsive UI for users to easily schedule pickups, deliveries, and select laundry services (wash & fold, dry cleaning, etc.).
- Leveraged React Native to ensure the web app functions seamlessly across various devices and screen sizes.

- Integrated with a backend system (Firebase) to manage user data, order details, and laundry service information.
- Implemented additional features like payment processing, order tracking, and push notifications for order updates.

LATEST NEWS WEBSITE

- Developed a news website (or platform) using [CMS/framework] (if applicable).
- Curated and managed content strategy for consistent publication of informative and engaging news pieces (articles, videos, podcasts - specify as applicable).
- Optimized website for search engines (SEO) to increase visibility and organic traffic.
- Implemented features to enhance user experience (e.g., content categorization, search functionality, social media integration).
- Utilized web analytics tools (Google Analytics) to understand audience demographics and content preferences.
- Employed strategies to attract and retain website visitors (social media promotion, email marketing).

RAIZO (Under Development)

- A website which helps you to find the nearest bike ride and helps to reach your destination.
- Utilized web development technologies (Javascript, Python) to build a user-friendly interface and implement core functionalities.
- Integrated with third-party APIs for features like maps (Google Maps) and potentially payment processing (Stripe).
- Employed a database management system (PostgreSQL) to store user data, ride information, and facilitate efficient data retrieval.

ADDITIONAL

Technical Skills: SQL, Vue, JavaScript, HTML/Tailwind CSS; Proficient in React JS, React Native, MongoDB, Node JS, Express JS

Languages: Fluent in Hindi; Conversational Proficiency in Hindi, English
